

Team Lead Guide

Meena Radiology Scheduling

Running your branch: building the rota, first leave approval, sign-ups and swaps.

Welcome, Team Lead

You run the scheduling for YOUR branch: build and generate the monthly rota, give the first approval on your staff's leave, and submit the rota for the manager to approve. You only see and act on your own branch.

1. Signing in

1. Open the platform link and sign in with your username and password.
2. Change your password anytime from the sidebar -> Change password.

2. Building the monthly rota

1. Open Schedule. Your branch and the month are shown at the top.
2. Click Generate to auto-build the rota (it respects approved leave and limits).
3. Adjust any cell by clicking it and picking a shift.
4. Use Settings (gear) to set per-section limits (min/max mornings & nights).

Generate only counts APPROVED leave. Approve leave first so it shows on the rota.

3. Submitting for approval

1. When the rota is ready, click Submit — it goes to the manager as 'Pending'.
2. The manager Approves (locks it) or Returns it to you with notes.
3. While a schedule is approved/locked you can't edit it — ask a manager to reopen.

4. Leave — first approval (stage 1)

When your staff request leave, it comes to you first.

1. Open Leave — requests show as 'Awaiting team lead'.
2. Click 'Approve -> manager' to pass it up, or Reject.
3. After your approval it shows 'Awaiting manager' until the manager finalises it.

5. Approving your staff's sign-ups

1. When you share the staff invite link, new sign-ups appear on the Staff page.
2. Review the details and Approve — this creates their account and rota record.
3. Reject if the details are wrong; the person can re-submit.

6. Shift swaps for your branch

After two colleagues agree a swap, it comes to you. Open Swaps and Approve the items marked 'Awaiting team lead'; it then goes to the manager for the final step.

7. Daily cases

- Open Daily Cases and fill your branch's report for the day.
- Save keeps a draft; Submit locks it. A manager can reopen if needed.
- Night reports filed after midnight still count for the day they covered.
