

Manager Guide

Meena Radiology Scheduling

Your day-to-day flow: reviewing schedules, final leave approval, daily cases and reports.

Welcome, Manager

As a manager you are the department reviewer: you give final approval on schedules and leave, oversee every branch, and keep the daily case reports on track. This guide walks through your day-to-day flow.

1. Signing in

1. Open the platform link and enter your username and password.
2. You land on the Home dashboard with a snapshot of what needs you.
3. Forgot your password? Use 'Forgot password?' on the sign-in screen.
4. Change your password anytime from the sidebar -> Change password.

2. Home dashboard

The Home page shows KPI cards (today's cases, patients, branches submitted, pending items) and quick action chips. The numbers are live — click a chip to jump straight to what needs action.

3. Reviewing & approving schedules

1. Open Review from the sidebar — it lists every branch's schedule for the month.
2. A schedule submitted by a team lead shows as 'Pending'.
3. Open it, check the rota, then Approve (locks it as the official rota) or Return it for changes.
4. You can also fix individual cells directly if needed.

Tip: the review badge in the sidebar shows how many schedules await you.

4. Leave — final approval (stage 2)

Leave approval is a two-stage chain. The branch team lead approves first; the request then arrives to you for the FINAL decision, which is what places the leave on the rota.

1. Open Leave. Requests waiting on you show as 'Awaiting manager'.
2. Click Approve to finalise (it lands on the rota) or Reject.
3. If approving would leave a shift uncovered, you'll get a warning to confirm.
4. You can also record leave directly — as a manager it's approved immediately.

5. Shift swaps — final approval

A swap goes: colleague accepts -> team lead approves -> manager approves. Your approval applies the swap to the rota. Open Swaps and act on items marked 'Awaiting manager'.

6. Daily cases

1. Open Daily Cases to see every branch's numbers for the day.
2. Use 'Remind pending' to nudge branches that haven't submitted yet.
3. Need to fix a locked report? Open it and use Reopen (manager only).

4. Use Print / PDF for the branded 'Radiology Daily Statistics' report.

7. Reports (PDF)

- Schedule: open a rota and click Print -> a branded landscape roster with a Prepared by / Approved by signature block.
- Daily Cases: Print / PDF -> KPI cards, branch breakdown, modality mix and key notes.
- Both export as PDF (use your browser's 'Save as PDF').

8. Staff & registrations

You can view and manage staff across branches, and approve staff self-registrations. (Creating branches, shift types, user accounts and the invite links are handled by the Super Admin / owner.)
