

## PLATFORM GUIDE

# Meena Scheduling — Features & Capabilities

A complete tour of the platform for managers — from Nafath onboarding to operations, scheduling, leaves and notifications.

# Overview — what Meena does

An end-to-end staff scheduling platform for the radiology branches.

## At a glance

- Verified onboarding with Nafath identity + WhatsApp + email.
- Automatic rota generation, fill-blanks, and cross-branch cover.
- Leave, sick-leave & time-back with smart cover suggestions.
- Shift swaps, daily-case reporting, and live notifications.
- Role-based access: staff, team lead, manager, admin.

Meena Scheduling

# Onboarding — identity with Nafath

New staff verify their real identity through Nafath before an account is created.

## What this page does

- Enter National ID / Iqama; a request is pushed to the Nafath app.
- The official name is returned by Nafath and locked onto the record.
- No manual invite codes to share — identity is the gate.
- Backed by SDAIA — the National Single Sign-On.

# A guided, step-by-step sign-up

Onboarding is a clean wizard — each step is verified before the next.

## What this page does

- Mobile number confirmed with a one-time code over WhatsApp.
- Work email confirmed with a 6-digit code (@meena only).
- Then staff details, then username & password.
- Five clear steps with progress and back/continue.

# Instant activation & sign-in

On the last step the account is created and the staff member is signed in — no approval needed.

## What this page does

- Staff land in the app immediately after sign-up.
- Team-lead & manager sign-ups still require an admin (privileged).
- Sign in any time with the chosen username and password.
- Forgot-password recovery by email.

# My Schedule — the staff portal

Every staff member gets a personal view of their month.

## What this page does

- Monthly calendar of shifts, colour-coded (Morning / Night / Off).
- Live leave balance and a countdown to the next approved leave.
- Shows whether the rota is approved or still a draft.
- Request leave, see swaps, and report cases from one place.

# Requesting leave & time-back

Staff raise their own requests; approvals route automatically.

## What it does

- Annual / sick leave with date ranges; balance updates live.
- Time-back: claim hours back after covering an extra shift.
- Track every request's status (awaiting lead, awaiting manager, approved).
- Withdraw a pending request before it's approved.

**Leave & time-back**

# Manager home

The home screen surfaces what needs attention across all branches.

## What this page does

- Tiles: today's cases, patients, branches reported, items awaiting you.
- Pending approvals grouped and actionable in one place.
- Live daily-cases progress bar.
- Clean overview; deeper tools one click away.

# Instant staff search

Find any staff member by name or employee ID in one box.

## What this page does

- Shows branch, section, contact, shifts & leave this month, live balance.
- ✓ Nafath badge confirms verified identity.
- Quick General / Ultrasound filters; recent staff chips.
- Jump straight to a staff member's rota.

# Staff directory & approvals

Manage the team and approve privileged sign-ups.

## What this page does

- Staff grouped by branch, with section, ID and contact; edit or remove.
- Pending team-lead / manager registrations shown with National ID + ✓.
- Approve or reject privileged sign-ups in one click.
- Add staff manually when needed.

# Leave management & approvals

Leave requests flow through the right approvers (team lead → manager).

## What this page does

- Annual, sick and time-back requests in one place with day counts.
- Approve directly or open for review; coverage gaps flagged first.
- Leave balances accrue automatically (22 days/year).
- Bulk 'approve all pending' for fast clearing.

# Sick-leave cover suggestions

When someone calls in sick, see who can cover that exact day and shift.

## What this page does

- Only free, same-section staff for the missing shift (M / N).
- Grouped ☒ Same branch — preferred, then  Other branches.
- Lightest-workload first; one tap assigns the cover.
- The cover lands on the covering staff member's own rota.

# Shift swaps

Staff swap shifts through a safe, multi-stage approval chain.

## What this page does

- Peer accepts → team lead approves → manager gives final approval.
- Both staff are notified at request, decline and final approval.
- Overlapping or conflicting swaps on the same cell are blocked.
- Applied automatically to both rotas once approved.

# Schedule review & approval

Managers see every branch's schedule status and sign off across branches.

## What this page does

- At-a-glance counts: pending review, not submitted, approved.
- Per-branch status with who prepared it and shift counts.
- Approve, return for edits, or reopen an approved rota.
- Filter by month and status.

# Schedules & auto-generation

Generate fair monthly rotas in seconds, or fill only the gaps around manual choices.

## What it does

- One-click generate per branch & section using the solver.
- Fill-blanks: pin some cells, let the generator complete the rest.
- Cross-branch cover: pull surplus staff from sharing branches (Y3-aware) without touching rest days or exceeding shift counts.
- Submit → review → approve workflow between team lead and manager.
- Fridays-off targeting and per-shift (Morning/Night) balancing.

Schedule & rota

# Daily cases & reporting

Each branch submits daily case counts; managers see completion in real time.

## What this page does

- Per-modality counts (X-ray, CT, US, mammo, BMD...) + patient totals.
- Live progress: how many branches reported today.
- Branches that haven't submitted are reminded automatically.
- Printable daily-cases report.

# Printing & export

Share rotas and reports outside the app.

## What it does

- Print a clean monthly rota for a branch.
- Print the daily-cases report for any day.
- Print-optimised layouts (no sidebar, high contrast).
- Useful for noticeboards and records.

**Print & export**

# Notifications — in-app, WhatsApp & email

Everyone is kept in the loop on the channels that matter, tuned to stay high-signal.

Notifications

## What it does

- Staff: leave approved/rejected, swap updates, cover assignments, account activation — via WhatsApp + in-app.
- Managers & leads: items awaiting their approval (leave, time-back, swaps, schedules).
- Sick-leave alerts point straight to cover suggestions.
- Low-value noise is deliberately suppressed.

# Admin & configuration

System admins tailor the platform to how the branches work.

## What it does

- Branches: city, staff-sharing groups, and daily cover need.
- Users: accounts and roles (staff / team lead / manager / admin).
- Shift types: codes, colours, and times.
- Public holidays and per-section scheduling limits (min/max shifts).
- Audit log: a full trail of who did what.

**Admin & configuration**

# Roles & security

Access is scoped to each role, and sessions are protected.

## Roles & security

### What it does

- Staff see their own rota & requests; team leads manage their branch; managers span branches; admins configure the system.
- Identity verified at sign-up (Nafath); work-email + mobile confirmed.
- Privileged sign-ups (team lead / manager) require admin activation.
- Sliding 30-day sessions; dates shown in English throughout.
